Stats

What does it do?

It allows you to quickly and easily change the screen resolution and switch between fullscreen and windowed. You can use any resolution imaginable as long as it is positive number.

How do I use it?

In any scene, simply press alt + /, or click the toolbar button if it's available. It will automatically open up when you're in the settings menu.

This also means any resolution possible as long as it's a positive number

Choose between fullscreen or windowed.

Supports both stock and Blizzy toolbar

Requires the Toolbar Controller (available on Github here: <https://github.com/linuxgurugamer/ToolbarControl/releases>)

Requires the ClickThroughBlocker(available on Spacedock here: <https://spacedock.info/mod/1689/>)
